Projects

HomeQuest - Flatmate & Accommodation Finder Platform

Jun 2024

- Developed an accommodation and flatmate search platform using **React.js** and **Tailwind CSS** for the frontend.
- Utilized **Node.js**, **Express.js** and **MongoDB** for efficient data management and server-side operations.
- Integrated **Google OAuth** for secure sign-in, **Firebase** for image storage, and comprehensive search filters by city, gender, and price.
- Allowed users to post, update, delete vacancies, and directly contact posters via phone numbers.

FitFocus - Fitness Resource Website

Mar 2024

- Created a fitness gym exercise website using **React.js** for the frontend, and **Exercise DB** and **YouTube APIs** for the backend.
- Facilitated user searches for exercises by name or body part, provided detailed exercise information and advantages, linked relevant YouTube videos, and suggested similar exercises.

Personal Expense Tracking Dashboard

Oct 2023

- Designed and implemented a responsive **MS-Excel** dashboard to track personal expenses, categorize expenditures, and visualize data using pie and bar charts.
- Incorporated filtering functionality by time period with start and end dates also provided insights about savings.

Technical Skills

Languages: C++ , SQL , HTML , CSS , JavaScript

Databases: MySQL , MongoDB , MS Excel

Concepts: Data Structures and Algorithms , Object Oriented Programming
